

Agenda for 2010 ARC Webinar # 2

February 16, 2010, 1:00 – 3:00 p.m. Eastern

Vulnerability and Risk Assessment 2: Risk Assessment Approaches to Adaptation Planning

The second ARC webinar of 2010 will provide a detailed look at a risk assessment approach to climate change adaptation planning for different types of organizations including municipalities. Our first speaker's presentation discusses the step-by-step processes presented in a risk-based adaptation guide developed for Ontario, Alberta and northern communities. Participants are encouraged to review the Alberta Guide at: http://adaptation.nrcan.gc.ca/projdb/pdf/176b_e.pdf before the webinar. The second speaker presents an applied case example of the risk-based adaptation guide's steps as they were used by the British Columbia Institute Of Technology in their recent Hazard, Risk and Vulnerability Analysis.
