

Agenda for 2010 ARC Webinar # 4

April 20, 2010, 1:00 – 3:00 p.m. Eastern

Emergency Management and Response Planning

Climate change is expected to increase the severity and frequency of weather related emergencies and disasters. In this webinar, our speakers discuss 'mainstreaming' future climate change impacts and adaptation planning into today's emergency management and response planning. Our first speaker presents an overview of the intersections of adaptation and emergency response planning, and our second and third speakers discuss practical approaches to integrating adaptation into emergency management and response planning activities.

Chair: Jennifer Forkes, Clean Air Partnership (CAP)
