

Clean Air Council Webinar:

Municipalities and Youth – Webinar on Meaningful Engagement for Climate Action

In this webinar we talked with Laura Hache from Innovate MY Future (IMF). IMF is a platform for young people in the GTHA to channel their passion and energy to tackle climate change in tangible ways at the local level. The IMF program helps municipalities in the GTHA to support and mentor youth teams, and also acts as a mechanism for local governments to overcome the challenges in engaging with this demographic. In this webinar, we learned more about the outcomes of the last year's projects as well as the next steps and Phase 2.
