

Clean Air Council Webinar:

Solar, Micro-grids & Small Battery Technology Webinar

This webinar is part of a series on climate solutions that the Clean Air Partnership is providing throughout 2020. Bruce Nagy, author and host of the series, presented, microgrids, batteries, resilient systems and peak shaving for campuses, communities, and governments. In the second part of this webinar, Director of Engineering Katherine Peretick from NRStor, talked about several kinds of electricity storage; including examples of compressed air thermal energy storage in Goderich, ON, Festival Hydro battery installation in Stratford, ON, and a Flywheel in Minto, ON.

Presentations:

- Bruce Nagy, Micro grids and Batteries [Presentation recording](#)
- Katherine Peretick, Electricity storage [Presentation recording](#)
